

SYNTHETIC TEST DOCUMENT

Nature-screening procedure / version 1

TRACE Demo Wind A

Nature-screening procedure

Version 1 / published 1 March 2026

This invented report is provided only to test a research application. No statement describes a real company, facility or protected area.

Reporting basis: company self-disclosure for the stated 2026 procedure. No independent performance audit is included.

TRACE Demo Wind A is listed as operator of DEMO-WIND-01. Ownership share is not stated.

A separate dataset contains an unresolved candidate association with TRACE Demo Wind B. That association has not been verified.

In 2026, our nature-screening procedure covers all sites we operate, including sites acquired before 2026.

The procedure identifies topics for further assessment. It does not demonstrate that ecological impacts have been avoided.
