TRACE Demo Wind A

Nature-screening procedure

Version 2 / published 15 April 2026

This version replaces version 1 for the procedure described here. Earlier source bytes must remain available for historical research.

Reporting basis: a revised company policy statement. Its publication date and effective scope must not be confused with the date of a physical environmental event.

This revision does not report an environmental incident, a legal finding or a financial loss.

From 15 April 2026, this procedure applies only to sites newly acquired in 2026.
Earlier operating sites are outside its stated scope.

DEMO-WIND-01 entered operation in 2022. This update does not state whether a
separate nature-screening procedure covers that site.
